

User Guide

Step 1: Access the Application

1. Open any modern web browser such as Google Chrome, Microsoft Edge, or Mozilla Firefox.
2. Navigate to the deployed ResumeIQ application using the following URL:

Application URL: <https://resumeiq--ai.streamlit.app/>

3. Wait for the application to load completely.

Expected Outcome

The Home page is displayed, providing an overview of the application and navigation to all available modules.

Step 2: Upload Resume

1. Select the **Resume Analyzer** page from the navigation menu.
2. Click the **Browse Files** button.
3. Choose your resume in **PDF format**.
4. Wait until the file upload is completed.

Note

- Only PDF resumes are supported.
- The resume should contain selectable text for accurate analysis.
- Scanned image-based PDFs may produce incomplete results.

Expected Outcome

The uploaded resume is successfully processed and prepared for analysis.

Step 3: Enter the Job Description

1. Copy the complete job description from any job portal or company website.
2. Paste the content into the **Job Description** text area.

For better analysis, include:

- Required Technical Skills
- Responsibilities
- Qualifications
- Preferred Technologies
- Experience Requirements

Expected Outcome

The job description is successfully loaded into the application.

Step 4: Analyze the Resume

1. Verify that:
 - A resume has been uploaded.
 - A job description has been entered.
2. Click the **Analyze Resume** button.
3. Wait a few seconds while the application processes the information.

During analysis, ResumeIQ performs the following operations:

- PDF Text Extraction
- Text Preprocessing
- Skill Extraction
- TF-IDF Vectorization
- Cosine Similarity Calculation
- Resume-Job Matching
- Skill Gap Analysis

Expected Outcome

The application generates a detailed analysis including:

- Resume Match Percentage
 - Matching Skills
 - Missing Skills
 - Additional Skills
 - Career Recommendations
-

6. Dashboard

The Dashboard provides a graphical representation of the resume analysis results.

Resume Match Score

Displays the overall compatibility between the uploaded resume and the provided job description.

A higher percentage indicates a stronger match.

Matching Skills

Shows the skills that are present in both the resume and the job description.

These represent the candidate's strengths for the selected role.

Missing Skills

Displays the required skills that were identified in the job description but are absent from the resume.

These skills can be learned or added to improve future job applications.

Additional Skills

Lists the skills found in the resume that are not specifically mentioned in the job description.

These may provide additional value to potential employers.

Interactive Visualizations

The dashboard includes multiple charts to improve understanding of the analysis results, such as:

- Resume Match Gauge
- Skill Distribution Chart
- Skill Comparison Graph

These visualizations enable users to quickly identify strengths and improvement areas.

7. Career Guidance

The Career Guidance module provides personalized recommendations based on the analysis results.

Users can:

- Identify missing technical skills.
- Follow a recommended learning roadmap.
- Access official learning resources.

- Improve resume quality for future applications.

The recommendations are designed to help users increase their resume compatibility with targeted job roles.

8. Troubleshooting and Solutions

Problem	Possible Cause	Recommended Solution
Resume upload fails	Unsupported file format	Upload the resume in PDF format only.
Resume text is not extracted correctly	Scanned or image-based PDF	Use a text-based PDF generated from a word processor.
Low resume match score	Missing required skills or keywords	Update the resume with relevant skills, projects, and experience related to the job description.
Dashboard is not displayed	Resume analysis has not been completed	Upload a resume, provide the job description, and click Analyze Resume .
Application is slow	Large PDF or temporary network delay	Wait for processing to complete or refresh the application.
Application does not load	Internet connectivity or temporary server issue	Refresh the browser or reopen the application after a few minutes.
